Hippothesis - Entertainment and learning through Exploration

Hippothesis, Early learner – Ages 3 to 7 is a fun new humorous 2D Animated science short format series that answer the “why” questions all young scientists have! Strong, simple, linear stories with one science concept creatively delivered.

Our stars, Dawn, the pygmy Hippopotamus, and Edward the dog, explore their everyday environments and learn about the natural world around them. Dawn enthusiastically investigates anything, while Edward approaches the world more methodically - wanting to know what the result will be before they even start.

Every episode features a “Paws” lead by Edward, where he pauses the action and asks the audience a direct question regarding today’s concept, which allows the children at home to predict how the situation will go.

**“Do you think Dawn can become a nocturnal creature?
Will Dawn be able to fly away like a bird?”**

The end of every show features an at-home experiment, which gives children the opportunity to explore and integrate today’s concept through their own imaginative play. These experiments are in keeping with **Mary Warnock**, a philosopher of education, who suggested that *children’s education should be pleasurable and engaging*.

How can I be a fog machine?

Why don’t I have an exoskeleton?

Monster Entertainment Originalos! Family Non Dialogue Series

ORIGINALOS?

ORIGINALOS? An extremely funny dialogue-free stone-age animated comedy for all the family. Each episode takes off with the invention of a specific object or idea that we use in our everyday life. At the time it was invented it must have been a milestone along the bumpy road of development. Like the invention of the football, fire, wheel, fitness, love, flushing toilets and much more.

We watch some of the difficulties the inventors may have met before the right idea appeared, with hilarious

results! We see one or two of the wrong turns that a good invention could have taken. The episodes are set a number of years before the invention was perfected. E.g. the wheel has not quite found the right shape yet and some of the originalos people can not see any use for the soup plate.

They may not all be scientifically proven facts but ORIGINALOS? will give you a great laugh, and maybe an idea or two !
